Search and Selection

Qualitair also supports clients with their permanent recruitment requirements. We are able to save you both time and money! How?

Recruitment is our core business and we are able to access candidates very quickly via our internal database, our researchers, and other external databases. Advertising is often cheaper for us to manage as we advertise daily in a variety of media. We conduct initial interviews with candidates, and only present you with a short list of candidates that match your specific requirements. The process saves your internal administration departments a vast number of hours in terms of processing and interviewing time. We offer a compliant service meeting for the requirements of employment legislation.

Services offered:

- Permanent Recruitment
- Temporary to Permanent
- Executive Head Hunts

Our Recruitment Process

Qualitair's business is characterised by its rigorous selection and interview process, which allows an exact match of skills and client requirements. The philosophy being that a company would not employ a permanent member of staff without an interview, the same is true for Qualitair and contract personnel. It is therefore our company policy to interview all applicants prior to offering either contract or permanent work. We believe that this makes Qualitair unique in the industry by being the only contract company spending large amounts of time, energy and resources to ensure that the client has the best possible personnel available.
